PROJECTS

Bajaj Showroom

The project entitled " Bajaj Showroom" is to be developed for maintaining the show room activities like , customer maintenance, customer quotation generation , vehicle sales , customer dues maintaining for the installment customers, vehicle service and spare parts sales, Customer follow ups details, customer feedback form entry and employee details and Employee records. The system is efficient in generating reports which will help in the maintenance of the showroom easily.

Dairy Management System

•   A current system works manually &report generation is difficult for these purpose we decide to create one desktop application that is Dairy Management System. This is a proposed system.It is based on VB.Net.This is a user friendly.It support simplified development.
•   Now a day for manage any dairy record to need manage all dairy records.
•   The mission of the Dairy Management project is to create for communication between rural area people and dairy management. Our main goal to develop this application to encourage dairy industry. Dairy management system is a software application to maintain day to day transaction in a Dairy. This software help to register all the suppliers, buy, details, purchase, sales details etc.
